Education

- National Yang Ming Chiao Tung University**
Bachelor of Science in Computer Science
Sep 2023 - Jun 2027 (Expected)
GPA: 4.27/4.30, Ranking: 4/194 (Top 2%)
- KTH Royal Institute of Technology**
Exchange Student in Electrical Engineering and Computer Science
Jan 2027 - May 2027 (Expected)

Experience

- Google**
Software Engineering Intern, Android Jetpack (CameraX)
Jun 2026 - Sep 2026
New Taipei City, Taiwan
 - Designed and implemented public CameraX APIs, expanding media capture capabilities across the Android ecosystem.
 - Resolved multi-camera OEM fragmentation by abstracting physical lens topologies into declarative camera selection.
 - Architected an extensible audio pipeline, supporting low-latency PCM buffer modification and live analysis.
 - Engineered real-time zoom tracking across dynamic multi-lens transitions and hardened camera and audio stability.
- NYCU CS Information Technology Center**
Team Member, Net, Mail, PC & HPC
Jul 2024 - Dec 2026 (Expected)
Hsinchu City, Taiwan
 - Engineered multi-floor VLAN architectures and dynamic routing across Cisco and Juniper enterprise core switches.
 - Optimized and administered the department mail infrastructure with Postfix and Dovecot, serving 10,000+ accounts.
 - Deployed and operated a lab virtualization environment with Proxmox VE and VyOS for system and network services.
 - Orchestrated Slurm GPU compute clusters and fair-share scheduling, optimizing hardware utilization across labs.
- NYCU Computer Architecture System Lab**
Undergraduate Research Assistant (Advisor: Prof. Tsung-Tai Yeh)
Jul 2024 - May 2027 (Expected)
Hsinchu City, Taiwan
 - Designed a bit-serial accelerator for 1-2-bit LLM inference, amortizing serialization latency via row-level tiling.
 - Developed a cycle-level simulator, demonstrating a 3.5x speedup over a 64x64 systolic array baseline.

Projects

- NYCU CS Past Exam Platform**
A platform providing archived NYCU Computer Science exams and solutions for efficient exam preparation
Jun 2025 - Present
[Link](#) | [GitHub](#)
 - Re-architected the legacy exam archive into a full-stack platform using Vue 3, FastAPI, and MinIO storage.
 - Operated production services on a Linux VPS, reliably serving 3,400+ active users with 30,000+ exam downloads.
 - Engineered a retrieval and prompt pipeline with Google GenAI to generate tailored mock exams from course archives.
- AdaFreeU: Adaptive FreeU Parameter Prediction for Diffusion Models**
An adaptive framework for optimizing FreeU parameters in diffusion models
Apr 2026 - Jun 2026
[Link](#) | [GitHub](#)
 - Developed a Gaussian policy for adaptive FreeU parameter prediction from text and image features.
 - Trained the policy with reward-weighted learning to prioritize high-reward parameter configurations.

Achievements

- Academic Achievement Awards** (Ranked 1st in class)
Fall 2025, Spring 2024
- ICPC Asia Taoyuan Regional Programming Contest** Bronze Award
Oct 2023
- NSTC University Student Research Project** National Research Grant Recipient
Jul 2025 - Feb 2026
- Department Capstone Project Competition** Merit Award (Top 10%)
Jul 2025
- Foundation Academic Course Award** Digital Circuits & Computer Organization (Top 5%)
Spring 2024

Extracurricular Activities

- Teaching Assistant** CCNA, Computer Organization
Feb 2025 - Jun 2026
- Development Team Leader** Meichu Hackathon
Nov 2024 - Oct 2025
- Frontend Training Program Mentor** NYCU Google Developer Groups
Sep 2024 - Jun 2025

Technical Skills

- Languages** C++, Python, Kotlin, Java, C, JavaScript, Bash, Verilog, Go, Rust
- Systems & DevOps** Linux, Docker, Kubernetes, Proxmox VE, Nginx, Postfix, Dovecot, Slurm
- Databases & Storage** PostgreSQL, MySQL, Redis, MinIO (S3)
- Tools** Git, Gradle, CMake, Make, LaTeX, Markdown
